

CNG REFUELING SYSTEMS

Since 1983, ANGI Energy Systems has grown to be North America's leading supplier of CNG refueling equipment for natural gas vehicles by providing reliable and innovative systems.

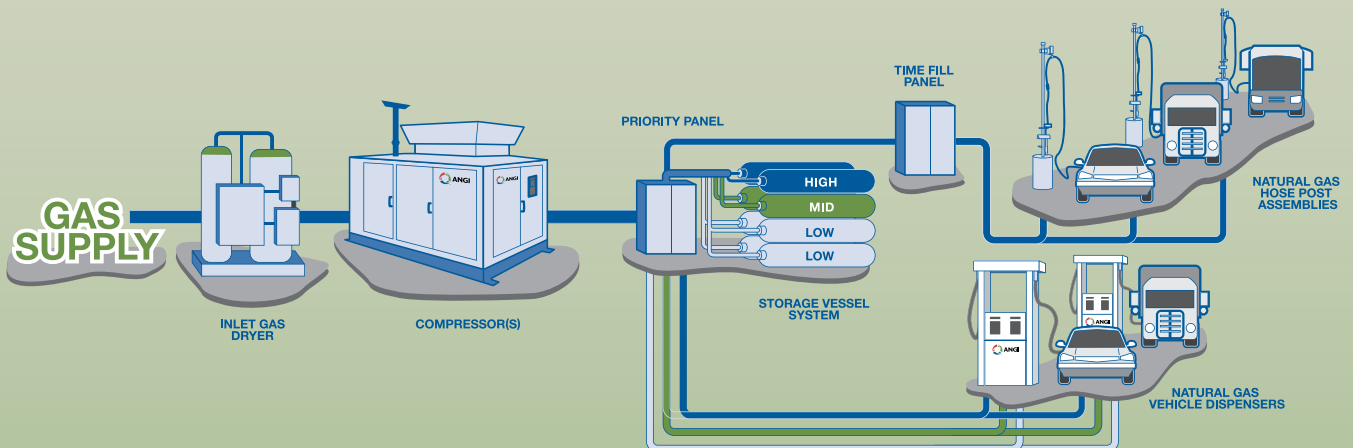

FAST FILL SYSTEMS provide immediate dispensing of CNG to vehicles ranging from passenger cars and fleet trucks to transit buses.

TIME FILL SYSTEMS are a cost effective fueling option that allow vehicles to conveniently refuel overnight or when the vehicles are not in use.

COMBINATION SYSTEMS feature both a fast fill and time fill system allowing high utilization of the compression capacity both day and night.

PROUD PACKAGER OF
ARIEL COMPRESSORS

ARIEL CORPORATION is the largest manufacturer of gas compressors in the world, and sets the standard in quality, reliability, and customer support. Ariel has built a reputation for safe, rugged, and long-lasting compressors and cylinders. Ariel's CNG compressors are based on the same designs that are used in field gas, process and transmission services, and are built to run 24 hours a day, 365 days a year.

ALL SYSTEMS CNG

We deliver leading edge CNG equipment with the lowest overall life cycle costs and have a long-standing reputation as a leader in the high pressure compression industry. ANGI provides superior customer service, project management, maintenance, and training programs that ensure the success of a project.

MOTHER SYSTEMS are used to fill large volumes of CNG into mobile storage trailers that are then transported to daughter stations.

DAUGHTER SYSTEMS are installed where a CNG fill station utilizes mobile CNG storage as the fuel source for the station.

TUBE TRAILER SYSTEMS are used to supply industrial operations and stationary engines with natural gas where there is no natural gas pipeline.

MADE WITH PRIDE IN THE USA.
