

OPW brand nozzles... “The most trusted handshake in the fueling industry.”

May 2019

OPW is pleased to introduce the new **NT2A [Nozzle Type-2, Class A]**, for your fleet time-fill and traditional dispensing applications. This nozzle is a true Class A design capable of achieving 100,000 fueling cycles. OPW manufactures this nozzle in the USA and has achieved 3rd party approval to the most recent NGV1 and ISO14469 standards. *You can be assured of compliance when you choose OPW CleanEnergy Fueling Products.*

The NT2A series has the features you requested:

- ✓ Push on – Pull off functionality
- ✓ Stainless Steel spout optimized for those hard-to-reach fuel ports
- ✓ Compatible with NGV-1 P30 / P36 as well as ISO14469 B200 / B250 receptacles
- ✓ OPW Jaw Lock® technology to maximize vehicle receptacle life
- ✓ Color coded spout tip to identify operating pressure at a glance
- ✓ Best in class internal seals for positive gas containment
- ✓ Inlet connection is threaded for the popular SAE-6; 9/16”-18 UNF
